Paperless document management systems for law firms of all sizes.

SAFE electronic document management software makes it possible for law firms to decrease time spent filing and looking for documents – leading to increased efficiency and improved client service. It's like finding more billable hours, every single week.

Available both as hosted software and in the cloud, SAFE allows for easy filing, retrieval and editing of letters, contracts, pleadings, claims, referrals, scans, emails, standard forms, phone messages and more. Scanning, filing and routing stop being work-intensive, paper-based tasks and become repeatable, automated digital workflows. The result is more efficient information sharing, more effective process controls and improved productivity.

With SAFE, you get:

- 24/7/365 access to all documents and case records – even on iPad!
- Sophisticated, rules-based automated document routing and management – fully integrated with workflow, scheduling and forms management capabilities
- Secure document sharing with clients
- Fixed licensing, maintenance and support costs
- Granular security tailored to the unique needs and sensitivities of law firms and legal offices
- Powerful redaction tools to remove sensitive information from documents
- Priority access to a dedicated, multi-person support staff

Many of our clients have found that document management software licenses run a fraction of paper storage and retrieval costs.

Go ahead, go paperless: There's nothing stopping you.

Going paperless doesn't mean modifying your fundamental processes, changing your corporate culture or making a massive technology investment.

SAFE and SAFE CLOUD are designed to make it easy for you to transition away from paper-based processes or legacy software.

- **Hosted or cloud-based:** Firms with robust IT capabilities benefit from SAFE, our traditional document management solution, sold as installed software. For other firms, there's SAFE CLOUD, our SaaS system, offering the same features in the cloud for a monthly subscription fee.
- **No learning curve:** Our software is intuitive and simple for both veterans and new users. And because we only deploy SAFE and SAFE CLOUD after an in-depth discovery process, they're always configured to your existing business practices, security rules and compliance needs.
- **Complete security:** SAFE and SAFE CLOUD allow you to securely back up documents and records, and store and share them in full compliance with federal, state and local statutes and regulations.
